Figure 8

## HEAVY-DUTY 355 MM (14") CHOP SAW D28871 / D28870

### **Congratulations!**

You have chosen a DEWALT tool. Years of experience, thorough product development and innovation make DEWALT one of the most reliable partners for professional power tool users.

## **Technical data**

|                             |                  | D28871        | D28870     |  |  |
|-----------------------------|------------------|---------------|------------|--|--|
| Voltage                     | ٧                | 220-240       | 220-240    |  |  |
| Power Input                 | W                | 2,200         | 2,200      |  |  |
| No-load speed               | min <sup>1</sup> | 3,800         | 3,800      |  |  |
| Min.peripheral speed        |                  |               |            |  |  |
| cutting disc                | m/s              | 80            | 80         |  |  |
| Disc diameter               | mm               | 355           | 355        |  |  |
| Disc bore                   | mm               | 25.4          | 25.4       |  |  |

## **Definitions: Safety Guidelines**

The definitions below describe the level of severity for each signal word. Please read the manual and pay attention to these symbols.

DANGER: Indicates an imminently hazardous situation which, if not avoided, will result in death or serious injury.

WARNING: Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

**CAUTION:** Indicates a potentially hazardous situation which, if not avoided, **may** result in **minor or moderate injury**.

NOTICE: Indicates a practice not related to personal injury which, if not avoided, may result in property damage.

Denotes risk of electric shock.

Denotes risk of fire.

**WARNING:** To reduce the risk of injury, read the instruction manual.

## **General Power Tool Safety Warnings**

WARNING! Read all safety warnings and all instructions. Failure to follow the warnings and instructions may result in electric shock, fire and/or serious injury.

### SAVE ALL WARNINGS AND INSTRUCTIONS FOR FUTURE REFERENCE

The term "power tool" in the warnings refers to your mains-operated (corded) power tool or battery-operated (cordless) power tool.

### 1) WORK AREA SAFETY

- a) Keep work area clean and well lit. Cluttered or dark areas invite accidents.
- b) Do not operate power tools in explosive atmospheres, such as in the presence of flammable liquids, gases or dust. Power tools create sparks which may ignite the dust or fumes.
- c) Keep children and bystanders away while operating a power tool. Distractions can cause you to lose control.

### 2) ELECTRICAL SAFETY

 a) Power tool plugs must match the outlet. Never modify the plug in any way. Do not use any adapter plugs with earthed (grounded) power tools. Unmodified plugs and matching outlets will reduce risk of electric shock.

- Avoid body contact with earthed or grounded surfaces such as pipes, radiators, ranges and refrigerators. There is an increased risk of electric shock if your body is earthed or grounded.
- c) Do not expose power tools to rain or wet conditions. Water entering a power tool will increase the risk of electric shock.
- d) Do not abuse the cord. Never use the cord for carrying, pulling or unplugging the power tool. Keep cord away from heat, oil, sharp edges or moving parts. Damaged or entangled cords increase the risk of electric shock.
- e) When operating a power tool outdoors, use an extension cord suitable for outdoor use. Use of a cord suitable for outdoor use reduces the risk of electric shock.
- f) If operating a power tool in a damp location is unavoidable, use a residual current device (RCD) protected supply. Use of an RCD reduces the risk of electric shock.

### **3) PERSONAL SAFETY**

- a) Stay alert, watch what you are doing and use common sense when operating a power tool. Do not use a power tool while you are tired or under the influence of drugs, alcohol or medication. A moment of inattention while operating power tools may result in serious personal injury.
- b) Use personal protective equipment. Always wear eye protection. Protective equipment such as dust mask, non-skid safety shoes, hard hat, or hearing protection used for appropriate conditions will reduce personal injuries.
- c) Prevent unintentional starting. Ensure the switch is in the off position before connecting to power source and/or battery pack, picking up or carrying the tool. Carrying power tools with your finger on the switch or energising power tools that have the switch on invites accidents.
- d) Remove any adjusting key or wrench before turning the power tool on. A wrench or a key left attached to a rotating part of the power tool may result in personal injury.
- e) Do not overreach. Keep proper footing and balance at all times. This enables better control of the power tool in unexpected situations.

- f) Dress properly. Do not wear loose clothing or jewellery. Keep your hair, clothing and gloves away from moving parts. Loose clothes, jewellery or long hair can be caught in moving parts.
- g) If devices are provided for the connection of dust extraction and collection facilities, ensure these are connected and properly used. Use of dust collection can reduce dust-related hazards.

### 4) POWER TOOL USE AND CARE

- a) Do not force the power tool. Use the correct power tool for your application. The correct power tool will do the job better and safer at the rate for which it was designed.
- b) Do not use the power tool if the switch does not turn it on and off. Any power tool that cannot be controlled with the switch is dangerous and must be repaired.
- c) Disconnect the plug from the power source and/or the battery pack from the power tool before making any adjustments, changing accessories, or storing power tools. Such preventive safety measures reduce the risk of starting the power tool accidentally.
- d) Store idle power tools out of the reach of children and do not allow persons unfamiliar with the power tool or these instructions to operate the power tool. Power tools are dangerous in the hands of untrained users.
- e) Maintain power tools. Check for misalignment or binding of moving parts, breakage of parts and any other condition that may affect the power tool's operation. If damaged, have the power tool repaired before use. Many accidents are caused by poorly maintained power tools.
- f) Keep cutting tools sharp and clean. Properly maintained cutting tools with sharp cutting edges are less likely to bind and are easier to control.
- g) Use the power tool, accessories and tool bits etc., in accordance with these instructions taking into account the working conditions and the work to be performed. Use of the power tool for operations different from those intended could result in a hazardous situation.

### 5) SERVICE

 a) Have your power tool serviced by a qualified repair person using only identical replacement parts. This will ensure that the safety of the power tool is maintained.

### Additional Safety Instructions for Chopsaws

- Always wear proper eye and respiratory protection.
- Before using, inspect the cutting wheel for cracks or flaws. If such a crack or flaw is evident, discard the wheel. The wheel should also be inspected whenever you think the tool may have been dropped. Flaws may cause wheel breakage.
- When starting the tool with a new or replacement wheel or if you are unsure of the condition of the wheel, hold the tool in a well protected area and let it run for one minute. If the wheel has an undetected crack or flaw, it should burst in less than one minute. Never start the tool with a person in line with the wheel. This includes the operator.
- In operation, avoid bouncing the wheel or giving it rough treatment. If this occurs, stop

the tool and inspect the wheel for cracks or flaws.

- Clean your chop saw periodically following the procedure in this manual.
- Do not remove wheel guards or base.
- ALWAYS USE THE VISE OR SPECIAL FIXTURE TO CLAMP WORK SECURELY. Other aids such as spring, bar, or C-clamps may be appropriate for certain sizes and shapes of workpiece. Use care in selecting and placing these clamps and make a dry run before making a cut.
- Use only 14" type 1 wheels rated at 4100 rpm or higher.
- Allow cut off parts to cool before handling.
- Do not attempt to cut wood or plastic with this tool.
- NEVER CUT MAGNESIUM WITH THIS TOOL.
- Use chop saw in a well-ventilated area.
- Turn chop saw off before removing any pieces from the base.
- DO NOT CUT ELECTRICALLY LIVE MATERIAL.
- Do not use circular saw blades or any other toothed blades with this tool. Serious injury may result.
- DO NOT OPERATE THIS TOOL NEAR FLAMMABLE LIQUIDS, GASES OR DUST. Sparks or hot chips from cutting or arcing motor brushes may ignite combustible materials.

- Warning to ensure that the abrasive cutting-off wheel is correctly fitted and tightened before use including an instruction to run the machine at no-load for 30 s in a safe position, and to stop immediately and replace the cutting-off wheel if there is considerable vibration.
- Do not use the side of the abrasive wheel as a deburring grinder. This will substantially weaken the wheel creating an unsafe condition. The wheel may come apart.

#### CAUTION: Wear appropriate hearing protection during use. Under some conditions and duration of use, noise from this product may contribute to hearing loss.

**CAUTION:**Spark deflector will get hot. Avoid touching or adjusting while hot. Keep cordset and materials away from spark deflector.

 Avoid prolonged contact with dust from power sanding, sawing, grinding, drilling, and other construction activities. Wear protective clothing and wash exposed areas with soap and water. Allowing dust to get into your mouth, eyes, or lay on the skin may promote absorption of harmful chemicals.

WARNING: Always use NIOSH/ OSHA approved respiratory protection appropriate for the dust exposure. Direct particles away from face and body. For your convenience and safety, the following warnings are on your Heavy-Duty 14" (355mm) Chop Saw:

## FOR SAFE OPERATION READ THE INSTRUCTION MANUAL.

- DO NOT USE TOOTHED BLADES.
- USE ONLY REINFORCED WHEELS RATED 4100 RPM OR HIGHER.
- WHEN SERVICING USE ONLY IDENTICAL REPLACEMENT PARTS.
- ALWAYS: WEAR EYE PROTECTION, USE GUARDS, CLAMP WORK IN VISE, USE PROPER RESPIRATORY PROTECTION.
- DO NOT EXPOSE TO RAIN OR USE IN DAMP LOCATIONS.
- ONLY USE CHOP SAW WHEEL OF A MAX. THICKNESS OF 2.8MM AND A MAX. DIAMETER OF 355mm.

6

### **Residual Risks**

The following risks are inherent to the use of these machines:

Injuries caused by touching the rotating parts.

 Injuries caused by disruption of the cutting disc.

- These risks are most evident:
  - Within the range of operation.

- Within the range of the rotating machine parts.

- In spite of the application of the relevant safety regulations and the implementation of safety devices, certain residual risks cannot be avoided. These are:
  - Impairment of hearing.

- Risk of accidents caused by the uncovered parts of the rotating cutting disc.

- Risk of injury when changing the disc.

Risk of squeezing fingers when opening the guards.

Read instruction manual before use.

## **Markings on Tool**

The following pictograms are shown on the tool:

Wear ear protection.

Wear eye protection.

Bore Diameter.

### DATE CODE POSITION

The date code (R), which also includes the year of manufacture, is printed into the housing surface that forms the mounting joint between tool and battery.

Example:

2013 XX XX

Year of Manufacture

## **Package Contents**

The package contains:

- 1 Chop saw
- 1 Hex key
- 1 Instruction manual
- 1 Wheel
- Check for damage to the tool, parts or accessories which may have occurred during transport.
- Take the time to thoroughly read and understand this manual prior to operation.

## **Description (fig. 1)**

**WARNING:** Never modify the power tool or any part of it. Damage or personal injury could result.

- a. Lock pin
- b. Spark deflector screw
- c. Spark deflector
- d. Base
- e. Fence
- f. Vise
- g. 8mm hex wrench
- h. Crank
- i Vise lever
- j. Wheel

### INTENDED USE

Your D28871 chop saw has been designed for the cutting of variously shaped steel materials.

**D0 N0T** use under wet conditions or in presence of flammable liquids or gases.

The D28871 chop saw is a professional power tool.

**DO NOT** let children come into contact with the tool. Supervision is required when inexperienced operators use this tool.

## **Electrical Safety**

The electric motor has been designed for one voltage only. Always check that the power supply corresponds to the voltage on the rating plate.

Your DEWALT tool is double insulated; therefore no earth wire is required.

If the supply cord is damaged, it must be replaced by a specially prepared cord available through the DEWALT service organisation.

- k. Spark guard
  - I. Wheel lock lever
  - m. Trigger switch
  - n Padlock hole
  - o. Extra blade bolt
  - p. Extra blade bolt washer

## **Using an Extension Cable**

If an extension cable is required, use an approved 3-core extension cable suitable for the power input of this tool (see *Technical Data*).The minimum conductor size is 1.5 mm<sup>2</sup>; the maximum length is 30 m.

When using a cable reel, always unwind the cable completely.

## **Connecting to the Mains**

The mains supply to be used for this machine must be equipped with a 16 A cut-out fuse with time delay.

## **Voltage Drops**

In rush currents cause short-time voltage drops. Under unfavourable power supply conditions, other equipment may be affected.

If the system impedance of the power supply is lower than 0.11  $\Omega,$  disturbances are unlikely to occur.

### ASSEMBLY

**WARNING:** Prior to assembly and adjustment, always unplug the tool.

## **OPERATION**

### Instructions for use

**WARNING:** Always observe the safety instructions and applicable regulations.

WARNING: To reduce the risk of serious personal injury, turn tool off and disconnect tool from power source before making any adjustments or removing/installing attachments or accessories.

## **Proper Hand Position (fig. 2)**

**WARNING:** To reduce the risk of serious personal injury, **ALWAYS** use proper hand position as shown.

**WARNING:** To reduce the risk of serious personal injury, **ALWAYS** hold securely in anticipation of a sudden reaction.

Proper hand position requires one hand on the main handle (cc), with the other hand guiding the workpiece.

### Soft Start Feature For D28871 only TIME DELAY RELAY (TDR II)

The soft start feature allows a slow speed run-up over 300 ms to avoid an initial jerk when starting. This feature is also particularly useful when the installed fuse value is too low or not of inert character.

### **Cutting Capacity**

The wide vise opening and high pivot point provide cutting capacity for many large pieces. Use the cutting capacity chart to determine total maximum size of cuts that can be made with a new wheel.

**CAUTION:** Certain large, circular or irregularly shaped objects may require additional holding means if they cannot be held securely in vise.

**CAUTION:** Do not cut magnesium with this tool. Damage to the saw and personal injury may result.

## To Carry (Fig. 1)

Fold down unit to position where you can carry the saw. Push in lock pin (a) to lock arm down.

## Unlocking (Fig. 1)

To unlock tool and raise head, depress motor arm slightly and pull lock pin (a) out. Motor arm will then pivot upward.

## **Material Clamping and Supporting**

- Angles are best clamped and cut with both legs resting against base.
- A spacer block (r) slightly narrower than the workpiece (t) can be used to increase wheel utilization (Fig. 3).
- Long workpieces must be supported by a block (s) so it will be level with top of base (Fig. 4).The cut-off end (t) should be free to fall downward to avoid wheel binding.

## Spark Deflector Adjustment (Fig. 1)

To best deflect sparks away from surrounding persons and materials, loosen the screw (b), adjust the spark deflector (c) and then retighten screw.

**CAUTION:** Risk of property damage. Do not allow cordset to come into contact with deflector or sparks as damage to cordset may occur.

## Vise Operation (Fig. 5)

The vise has a quick travel feature. To release the vise (f) when it is clamped tightly, turn the crank (h) counterclockwise one or two times to remove clamping pressure. Lift the vise lever (i) up. Pull crank Usage (Fig. 1, 2) assembly out as far as desired. The vise may be shoved into work without cranking. Lower vise lever then tighten vise on work by using crank.

### Fence Operation (Fig. 5)

WARNING: To reduce the risk of injury, turn unit off and disconnect machine from power source before installing and removing accessories, before adjusting or changing set-ups or when making repairs. Be sure the trigger switch is in the OFF position. An accidental start-up can cause injury.

The fence (e) requires no tools to adjust. The quick release clamp lever (u) unlocks and locks the fence When the lever is rotated fully forward, the fence is unlocked. The fence can then be freely moved forward, backward or rotated to allow for the best cutting position for a new wheel and as the wheel wears.

Rotating the lever fully to the rear locks the fence in position selected. If the bottom leg of the lever is not horizontal (parallel to the base), the fence is not locked. Lever will only lock fence when there is strong resistance to moving it to rear. If resistance is light, adjust clamping force by tightening slightly the two bolts (v) holding the fence to the base. Test by reclamping and attempt to move fence.

## Fence Angle Adjustment (Fig. 6)

WARNING: To reduce the risk of injury, turn unit off and disconnect machine from power source before installing and removing accessories, before adjusting or changing set-ups or when making repairs. Be sure the trigger switch is in the OFF position. An accidental start-up can cause injury.

The angle adjustment indicator (w) is part of fence clamping system. Align the desired angle indicator line with the edge of the slot (x) in base.

### FOR A MORE ACCURATE SQUARE CUT

- 1. Unlock the fence.
- 2. Push the arm down until the wheel extends into the base.

- Place a square (y) against the wheel and adjust the fence against the square.
- 4. Lock the fence into position.

Refer to Figure 2 for proper body positioning during use.

To start the tool, depress the trigger switch (m).To turn the tool off, release the trigger switch. Keep hands and material from wheel until it has coasted to a stop.

To prevent unauthorized use of tool, install a standard padlock (not included) into the padlock hole (n) located in the trigger.

### Removal and Installation of Wheels (Fig. 7)

WARNING: To reduce the risk of injury, turn unit off and disconnect machine from power source before installing and removing accessories, before adjusting or changing set-ups or when making repairs. Be sure the trigger switch is in the OFF position. An accidental start-up can cause injury.

Removing and fitting a cutting disc (fig. 7)

- · Press and hold down the spindle lock (I).
- Rotate the cutting disc until it locks in flange (Z)
- Using the Allen key (8 mm) located in the holder in the tool base, remove the disc retaining bolt (O) by turning counterclockwise and then remove the flat washer (P) and the outer retaining flange (aa).
- · Release the spindle lock (I).
- · Replace the cutting disc and secure it with the outer retaining flange (aa) and flat washer (P) and the disc retaining bolt (O).

**NOTE:** Do not overtighten bolt. An extra blade bolt (o) and blade bolt washer (p) is stored on the back of the motor arm. The bolt and washer must be used together to safely clamp blade.

WARNING: Risk of personal injury. Check the work surface that the chop saw rests on when replacing with a new abrasive wheel. It is possible that the wheel may contact ANY ITEMS OR STRUCTURE THAT EXTENDS ABOVE work surface (under the base) when the arm is fully lowered.

## Mounting (Fig. 8, 9)

**CAUTION:** Tool must be supported on stable, level, non-skid surface to prevent unexpected movement when operating.

### PROCEDURE FOR PERMANENT MOUNTING

- 1. Drill four holes 8 mm (5/16") through the work surface (Fig. 8).
- Insert 1/4-20 screws down through the holes in the base and through holes in mounting surface. The approximate length of the screws should be the thickness of the mounting surface plus 102 mm (4").

### **CRADLE MOUNTING**

- 1. Cut two boards approximately 508 x 50.8 x 101.6 mm (20" long x 2" high x 4") wide.
- 2. Place chop saw at desired work location.
- 3. Place boards tightly along side, and nail to work surface (Fig. 9).

### Operation Tips for More Accurate Cuts

- Allow the wheel to do the cutting. Excessive force will cause the wheel to glaze reducing cutting efficiency and/or to deflect causing inaccurate cuts.
- · Properly adjust fence angle.
- · Make sure material is laying flat across base.
- Properly clamp material to avoid movement and vibration.

### MAINTENANCE

Your DEWALT power tool has been designed to operate over a long period of time with a minimum of maintenance. Continuous satisfactory operation depends upon proper tool care and regular cleaning.

WARNING: To reduce the risk of injury, turn unit off and disconnect machine from power source before installing and removing accessories, before adjusting or changing set-ups or when making repairs. Be sure the trigger switch is in the OFF position. An accidental start-up can cause injury.

**NOTE:** Unit may be converted to a three-wire twist lock cord set at an authorized service center.

### Lubrication

Closed-type, grease-sealed ball bearings are used throughout. These bearings have sufficient lubrication packed in them at the factory to last the life of the chop saw.

### Cleaning

**WARNING:** Blow dirt and dust out of the main housing with dry air as often as dirt is seen collecting in and around the air vents. Wear ANSI Z87.1 (CAN/CSA Z94.3) approved eye protection when performing this procedure.

**CAUTION:** When cleaning, use only mild soap and a damp cloth on plastic parts. Many household cleaners contain chemicals which could seriously damage plastic. Also, do not use gasoline, turpentine, lacquer or paint thinner, dry cleaning fluids or similar products which may seriously damage plastic parts. Never let any liquid get inside the tool; never immerse any part of the tool into a liquid.

### **Optional accessories**

**WARNING:** Since accessories, other than those offered by DEWALT, have not been tested with this product, use of such accessories with this tool could be hazardous. To reduce the risk of injury, only DEWALT, recommended accessories should be used with this product.

Consult your dealer for further information on the appropriate accessories.

Use only high-strength Type 1 organic bonded wheels rated 4100 rpm or higher.

### Protecting the environment

Separate collection. This product must not be disposed of with normal household waste.

Should you find one day that your DEWALT product needs replacement, or if it is of no further use to you, do not dispose of it with household waste. Make this product available for separate collection.

Separate collection of used products and packaging allows materials to be recycled and used again. Re-use of recycled materials helps prevent environmental pollution and reduces the demand for raw materials.

### **Service Information**

DEWALT offers a full network of authorized service locations through out India. All DEWALT Service Centers are staffed with trained personnel to provide customers with efficient and reliable power tool service. Wether you need technical advice, repair, or genuine factory replacement parts, contact the DEWALT location nearest to you.

### **Notes**

- DEWALT's policy is one of continuous improvement to our products and, as such, we reserve the right to change product specifications without prior notice.
- Standard equipment and accessories may vary by country.
- Product specifications may differ by country.

- Complete product range may not be available in all countries. Contact your local DEWALT dealers for range availability.
